Professional Experience

Mid UX Designer II – Orcs Must Die: By the Blade (VR Action-Adventure Game)

Teravision Games (Jan 2024 - Apr 2026)

- Prototyped core VR mechanics in Unreal Engine 5 for *Orcs Must Die: By the Blade*, contributing to the game's 4-star rating on the Meta Store through optimized combat and player flow.
- Designed the complete visual system and UI flows in Figma, establishing clear player progression and information hierarchy across all levels.
- Developed First Time User Experience (FTUX) flows and implemented onboarding missions in Unreal Engine using Blueprints for seamless new player integration.
- Designed pixel-perfect UI/HUD assets in Photoshop and Figma, then built interactive widgets in Unreal Engine for responsive real-time combat feedback.
- Created gameplay flow and combat documentation in Confluence to support efficient cross-team implementation by engineering, art, and animation.
- Led the UI redesign of the inventory system, resulting in significantly improved player comments and feedback post-launch.

Junior UI Designer – Captain Toonhead vs the Punks from Outer Space (VR Tower Defense)

Teravision Games (Jan 2023 - Dec 2023)

- Designed and implemented the UI for the largest game update, including a new Score-based Arcade mode and Survival experience, released across Meta Quest, Steam, PlayStation VR2, and Pico VR4.
- Created progression and scoring systems for both modes, designing all UI assets in Photoshop; this significantly improved player retention through clear visual feedback and intuitive rewards.
- Developed intuitive consultation and information spaces within Survival mode to enhance player interaction and accessibility of critical game information.

User Research Intern – Killer Klowns From Outer Space (Asymmetric horror game)

Teravision Games (Jun 2022 - Dec 2022)

- Conducted over 90 playtests with external players for *Killer Klowns From Outer Space*, an asymmetric AA horror game based on the cult movie, gathering key insights on gameplay experience.
- Analyzed playtest results and developed actionable recommendations that directly improved gameplay mechanics and overall user satisfaction.
- Designed the emotes wheel interface to enhance multiplayer player expression in the asymmetric horror experience.

Academic Background

Bachelor's Degree in Design

Los Andes University (Fed 2018 - Apr 2023)

- Focused on user-centered design, visual communication, and product development, with creative direction as the core axis connecting strategy, communication, and final graphic execution.
- Completed key courses, including **Interactive Environments** and **Design Study 5: Creative Direction**, strengthening skills in strategic vision, multidisciplinary projects, and holistic product design.
- Developed practical expertise in creating visual manuals, design systems, user flows, and integrating aesthetics with functionality across diverse design projects.

Minor in Visual Computing

Los Andes University (Jan 2020 - Apr 2023)

- Completed a minor in Visual Computing with a focus on creative development through computing, combining interactive media, visual design, and programming to enhance user experience.
- Studied key courses including **Video Games: History and Design**, **Object-Oriented Programming**, and **Design Study 6: Interactivity**, strengthening skills in interactive storytelling and user-centered design.
- Gained hands-on experience with development engines such as **Unity** and **Unreal Engine**, as well as **JavaScript**, through prototyping interactive pieces and video game projects.

Skills and Tools

- Design Tools: Figma / Photoshop / Illustrator / After Effects / Premiere Pro
- Engines: Unreal Engine 5 / UEFN / Unity / C++
- Languages: Native Spanish / English C1
- Skills: Adaptability / Fast Learner / Creativity / Prototyping
- Interests: Level Design / Illustration / Volleyball
